PROJECT PROFILE

Samarth Meditech Pvt Ltd

- **A web application for Warehouse Management and control.**

Worked on the client-side aspect of this project and built with modern frameworks and libraries like **React.js** and **React-Bootstrap** and done hybrid application for mobile, using **PWA** technology with **next js**.

This software makes warehouse management an easier task. This application has both an admin dashboard and a mobile application. The dashboard is a web application that keeps track of accounts and employees, Most importantly it keeps track of all purchases and sales and its main feature is to keep track of all orders with all details at every step of the order journey

- **A web application for Inventory Management and Invoicing for retail and wholesale pharmacies**

Worked on the client-side aspect of this project by using the latest technology **ReactJS**. This the software helps to boost productivity and efficiency with its new features like customized sales invoice generation, informative dashboards, and reports, accurate purchase invoice import, and advanced accounting features.

- **Amazon Web Service**

Having knowledge of creating **EC2 instances** and Deploying Node applications in AWS And creating S3 buckets and hosting static websites in AWS

Basic knowledge of Route53 DNS Management transferred a GoDaddy Domain to AWS.

- **Grocery e-commerce application**

This is an online organic products e-commerce platform that delivers products to the doorsteps. Worked on the admin side user interface layout modifications.

- **Samarth Meditech Company Website**

This is a static website that includes a company overview and all information about products, and services. Used **HTML,CSS,Javascript** technology to build..

- **College Website**

Developed Pre-University College website by using a static website generator that is **Gatsby** with **React-bootstrap**. Deployed the application in the **Bigrocker cloud platform**. The website shows an overview and all detailed information about the college.

- **Refer to GitHub for hobbies projects --- [Github](#)**

BLH Hitech Pvt Ltd

- **Lead Application**

Documenting requirements and designing the workflow process for Mobile and Web applications. Working with the development team in implementation and testing

- **Spout**

Alcohol inventory using IOT technology. Team member of Prototype development. Designed the parts of Spout using Catia V5. implementation and testing.
